

Geofabrics Australasia wins 1st runner up prize in IGS photo competition

Geofabrics Australasia has won first runner up prize in the annual International Geosynthetic Society (IGS) photo competition for this sunset photo showing our ELCOROCK® engineered sand filled containers protecting the beach in the background. For more details on the competition click

<http://www.geosyntheticssociety.org/default.aspx?PostID=12>

This photo illustrates how well our soft engineered approach to coastal erosion works. ELCOROCK® containers are robust and durable whilst still being able to enhance the natural environment. ELCOROCK® containers similar to these have been used in many other parts of the world with great results.

The ELCOROCK® engineered sand filled containers come in a range of different sizes and with over 15 years of research and development we will certainly be able to offer you a innovative solution.
